Turn Your Data Into A Competitive Advantage For AI

with N-iX and SageMaker Unified
Studio

E2E Governance

Integrated Data and AI Services

Enhanced with Generative AI

In today's rapidly evolving technological landscape, modern data and AI platforms have become the cornerstone of successful data management and AI strategies for organizations worldwide. As the volume, variety, and velocity of data continue to expand, businesses must adapt and leverage advanced data solutions to gain meaningful insights and maintain their competitive edge.

Introducing Amazon SageMaker Unified Studio

SageMaker Unified Studio, provides a fully integrated data solution, focusing on creating a seamless data consumption experience on top of a governed unified data layer. To simplify and unify the data ecosystem, SageMaker Unified Studio offers an integrated end-to-end solution for enterprises that covers everything from data movement to data science, real-time analytics, and business intelligence.

SageMaker Unified Studio

provides a unified development experience for building data-driven applications that utilize AWS's data, analytics, and machine learning (ML), and generative artificial intelligence (AI) services.
